And yes that was a great day with great people in a gold mine in AZ
New tires are on and TOUGH chains back to where they belong

Another day in paradise!
I am so blessed to be able to do this job and being around some of the biggest machines in the world. Having the opportunity to bring solutions to this industry and make a difference is so satisfying

INTERESTING!

This first time chain user loved so much his TOUGH chains and the ROI after only a few months, he decided to go all-in and cover his loader's 4 positions

CAT993K & TOUGH chains

Another 24/7 coal mine in Kentucky is using TOUGH chains

- Most cost-effective product of the market
- \$3,000 of additional free parts (Big value when you need to cut the chain)
- Better on-site service with the biggest dealer network
- NRS ready chains - Net Replacing System - Another 30% cost saving - swap only the tread and re-use intact sidewalls.
- And more ... just ask me

An other end user Happy with TOUGH chains quality

Time to Brag or to be Proud?

Let's do both

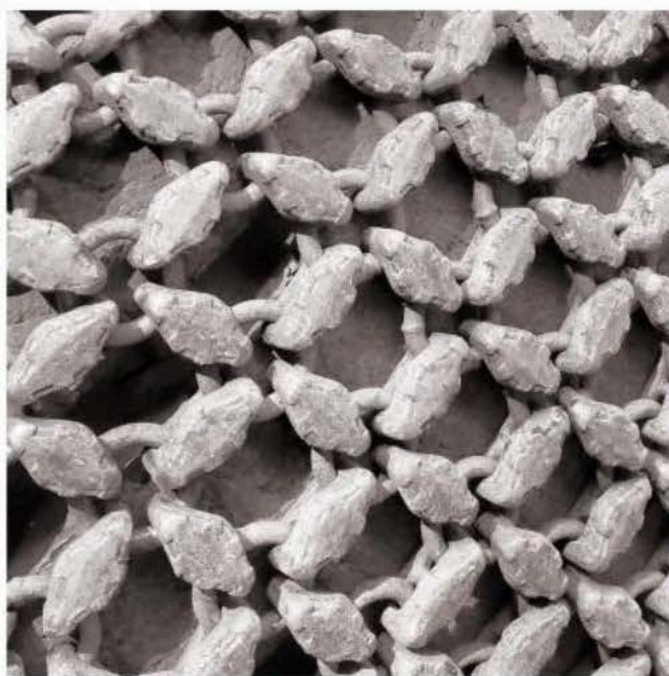

Thanks to Scott @OTRUSA for this 14 months inspection report

- TOUGH chains look like if we mounted them yesterday
- 50 years life expectancy. Yeah that's the projection based on actual wearing pace
- Michelin X-Mine D2 did not wear much neither

Tire Size 41.25/70R39

Machine CAT990II

We are not followers we are innovators!!

Tool box and spare parts box, mounting chain already setup with quick release inside/outside, smart auto-locking plate, color coding for fast mounting, smart crate, inside shortcut is a kids play..... And I promise some more features are coming soon.

All Chains should be TOUGH, but we make it easy.
